

Bagging Plants

BAGGING PLANTS

BMH has acquired a wide experience in bagging plants and has gained an enviable reputation by providing bagging plants for companies such as Sika, Flextile, KPM Industries and Mapei. Exceptional expertise and knowledge were developed in such critical phases as the dosing, weighing and mixing of ingredients as well as the proper handling of bags.

OUR TURNKEY PROJECTS CAN INCLUDE

- Multiple storage silos
- Micro-ingredients batching
- Multiple mixers
- Pneumatic transfer
- Computerized batch control system
- Multiple spout baggers
- Bag handling, palletizing and wrapping
- Dust collection system
- Vibrating and fluid bed dryers

HORIZONTAL SHAFT MIXER

This mixing is specially designed for dry mortar and works with dry materials in powder, granules and adherents.

Specifications

- Specially designed for dry mortar mixing
- Handles dry, powdered, granulated and sticky materials
- Wide range of models from 200 to 6000 litres output
- Powerful gearbox for maximum power, with the possibility of assembling a velocity regulator
- Uniform mixing through three dimensional materials spraying and agitation
- Hydraulic and pneumatic operated discharge doors
- High wear resistance
- Extreme low maintenance

PLANETARY MIXER

This planetary mixing action can produce a homogeneous mixture in a short period of time. It is optimal for a very wide variety of industries such as blocks & pavers, architectural products, concrete pipes, cored slabs, structural elements, etc.

Specifications

- Specially designed for pre-manufactured concrete and dry mortar
- Wide range of models, from 0.25 to 3 m³ output
- Counter current mixing system so that all the energy is projected onto the concrete
- Equipped with a hydraulic coupling to allow for a smooth emergency start-up when the mixer is full
- Reducers that are both powerful and robust
- Floor tile upgrade from 12 mm to 18 mm (610HB)
- Rubber/cast iron mixing paddles for optimum durability
- Drain hatch with a pneumatic/hydraulic opening
- Easy washing
- Further reduced maintenance
